

Sustainability at Procurri

Procurri works to keep its environmental, social and governance (ESG) performance positive by being a responsible, diverse and equal opportunities employer, extending product life where possible to reduce society's carbon and waste footprint.

Promoting re use over recycle, sustainability is at the heart of our core business ethos. Procurri targets itself with measurable environmental goals. These goals differentiate us, we work with our customers to extend the life of their IT infrastructure whilst our ITAD programme seeks to ensure a sustainable balance between re use and recycling of end of life hardware.

GREENHOUSE GASES

Scope 1	tCO ₂ e	111	129
Scope 2 (location-based)	tCO ₂ e	528	742 ³
Scope 2 (market-based)	tCO ₂ e	348	359
Scope 3	tCO ₂ e	277	284

¹The increase in Scope 2 (location-based) GHG emission in 2019 was due to increase in operations in Rockland Congruity LLC.

SCOPE 1

Includes direct emissions from sources which a company owns or controls. This includes direct emissions from fuel combustion and industrial processes.

SCOPE 2

Covers indirect emissions relating solely to the generation of purchased electricity that is consumed by the owned or controlled equipment or operations of the company.

SCOPE 3

Covers other indirect emissions including third-party provided business travel.
